

Monday, September 26, 2011

Time	Speaker	Title
8:45	Brenda Williams	<i>General Introduction to BIRS</i>
9:00	Michael Baake	<i>Opening</i>
9:10	Peter Stollmann	<i>Random operators: a short (hi)story</i>
10:30	Marcy Barge	<i>Hyperbolic substitutions</i>
15:15	Christoph Richard	<i>Ergodic properties of randomly coloured point sets</i>
16:30	Aernout van Enter	<i>Three questions from dynamical systems and their (lack of) progress I</i>
17:15	Jacek Miękisz	<i>Three questions from dynamical systems and their (lack of) progress II</i>

Tuesday, September 27, 2011

Time	Speaker	Title
9:00	Claus Michael Ringel	<i>The Fibonacci partition triangles and representations of quivers</i>
10:30	Uwe Grimm	<i>Generalized Thue-Morse sequences: spectral aspects</i>
11:15	Franz Gähler	<i>Generalized Thue-Morse sequences: topological aspects</i>
15:15	Greg Maloney	<i>Computing Čech cohomology made simpler</i>
15:45	Michael Boshernitzan	<i>Local complexity of finite sets</i>
16:30	José Aliste Prieto	<i>Almost periodic structures and semi-conjugacy</i>
17:15	Maria Isabel Cortez	<i>Invariant measures for non-primitive substitution tilings</i>

Wednesday, September 28, 2011

Time	Speaker	Title
9:00	Stephen Berman	<i>Early reminiscences of Robert Moody</i>
9:20	Jun Morita	<i>A personal history with Robert Moody</i>
9:40	Ian Putnam	<i>How to retire</i>
10:00	Jiri Patera	<i>New families of Weyl orbit functions</i>
11:00	Nicolae Strungaru	<i>Almost periodic measures</i>
11:30	Jeong-Yup Lee	<i>Revisiting substitution tilings</i>

Thursday, September 29, 2011

Time	Speaker	Title
9:00	Robert Moody	<i>Spatial stochastic processes and the inverse problem of diffraction</i>
10:30	Matthias Birkner	<i>Random measures and their diffraction</i>
11:10	Jonathan Breuer	<i>Non-intersecting paths with a staircase initial condition</i>
15:15	Anton Gorodetski	<i>Dynamical methods in the spectral theory of quasicrystals</i>
16:30	Natalie Priebe Frank	<i>Hierarchical tilings via fusion</i>
17:10	Lorenzo Sadun	<i>Complexity of tilings with infinite local complexity</i>

Friday, September 30, 2011

Time	Speaker	Title
9:00	Johannes Kellendonk	<i>On proximality</i>
10:30	Andras Sütő	<i>Practical phase retrieval</i>
11:10	William Yessen	<i>Spectral analysis of Fibonacci Jacobi operators</i>
14:00	Antoine Julien	<i>Robinson tilings via substitutions (with addendum by Franz Gähler)</i>
14:40	Bernd Sing	<i>How to reduce the height of a substitution</i>
15:20	Samuel Petite	<i>Minimizing invariant measures for the quasi-periodic Aubry-Mather theory</i>
