Integrality of unipotent subgroups of Kac-Moody groups

Abid Ali Rutgers University

Arithmetic Aspects of Algebraic Groups

BIRS-Banff (June-2022)

Joint work with Lisa Carbone, Dongwen Liu and Scott S. Murray

▲ロト ▲圖 ▶ ▲ 国 ▶ ▲ 国 ▶ ● 回 ● の Q @

This work addresses the generalization to infinite dimensions of the construction of Chevalley groups over $\mathbb Z$ associated to symmetrizable Kac–Moody algebras.

This work addresses the generalization to infinite dimensions of the construction of Chevalley groups over $\mathbb Z$ associated to symmetrizable Kac–Moody algebras.

We first examine Kac–Moody groups over \mathbb{Z} . By this we mean that group of ' \mathbb{Z} -points'.
